TASSP-1049 Opel Rekord P2 Bumper:

TASSP-1045 Triumph TR 3 Bumper :

TASSP-1051 Renault Dauphine Bumper:

Notes

The best bumper is made of stainless steel SAE 304, DIN 1.4301, UNS S30400
18-20% pure chrome content,
thickness 1.5- 2mm.

Back of bumper is covered by 3 coats of paint to protect the bumper from chemicals and weather elements. These paint coats will give the back a smoother finish.

The gloss of the bumper is shiny like mirror polish; even better than chrome bumper.

These bumpers will never rust.

The bumpers are duplicated from original sample bumper for fitting, shape, dimension etc...
